

# BILL PAY

A complete and automated bill pay solution for managing wireless expenses

## CONSIDER THIS...

- The paper invoice payment process costs an average company \$23 per invoice.
- Add the amount of time spent logging into portals, reconciling the invoice, and submitting proper paperwork, and the cost can rise by an incremental 40%.
- The process yields an estimated average total cost of \$32 per invoice. Multiply that by 500 or more invoices monthly.
- It doesn't end there. Payments get misapplied all the time. Now log into a portal, locate the invoice, call the carrier or provider, connect with the correct department, only to be transferred multiple times, get disconnected and try again.

*What is this activity costing your business? What is the impact of disconnected service due to failure to pay? Bill pay tasks can waste time and hurt your bottom line.*

### **vMOX Bill Pay, powered by Pay Clearly, delivers complete invoice lifecycle processing and automated payment**

**remittance to your wireless carrier.** With streamlined pay processes, you save time, avoid late fees, gain visibility and reduce exposure for potential fraud. You stay in complete control the entire time — making all approval decisions and managing AP — without the headaches or complexity.

# AUTOMATED PAYMENT WORKFLOW

## Disbursement

Payments are sent to carriers based on carrier enrollment preference.

- Virtual credit card
- ACH
- Enhanced ACH
- Check
- Email payments
- Portal automation
- Fax
- Concierge payments

## Consolidated Settlement

Settlement data is captured in a consolidated file and pushed back to your ERP for updates. You have full status visibility and reporting access through the vMOX OnePortal<sup>SM</sup>.

## FEATURES

Set and customize payment controls and vendor codes

Define approval workflows with routing and approval limits

Remove burden on Finance to manage payments to vendors

Enable full invoice lifecycle management through automation

Reduce late fees and invoice aging due to manual processes and payment management

## BENEFITS

### INCREASE REVENUE

- ✓ Optimize capital
- ✓ Focus on core business

### REDUCE EXPENSES

- ✓ Automated payments engine
- ✓ Reduce paper processing
- ✓ Redeploy AP processes

### MITIGATE RISK

- ✓ Real-time visibility
- ✓ Enhanced control
- ✓ Spend strategically
